ABDUL HADI

MERN Stack Developer | AI Engineer

+92 3126526771 | abdulhadi86411@gmail.com | LinkedIn | GitHub | DHA Multan, Pakistan

PROFESSIONAL SUMMARY

MERN Stack Developer with 3+ years of hands-on experience building scalable, high-performance web applications using React, Next.js, Node.js, Express.js, MongoDB, and TypeScript. Real-world experience integrating real-time features via Socket.io, secure JWT authentication, Firebase Cloud Messaging, and third-party APIs like Stripe. Alongside full-stack development, also works as a Backend & AI Engineer, building production-level Generative AI systems including Retrieval-Augmented Generation (RAG) pipelines, Vector Databases, AI Agents, and Speech AI integrations, bridging the gap between LLMs and deterministic business logic. Delivered production-ready SaaS platforms, RESTful backends, and AI-powered tools across diverse domains.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Redux, Tailwind CSS

Backend: Node.js, Express.js, Socket.io

Databases: MongoDB, MySQL, PostgreSQL

Generative AI: LLM Integration, RAG Pipelines, Vector Databases, AI Agents, Prompt Engineering, Speech AI Integration

Tools: Git, GitHub, Firebase FCM

EDUCATION

PMAS Arid University Rawalpindi, Pakistan
Bachelor of Science in Computer Science

WORK EXPERIENCE

MERN Stack Developer 08/09/2025 - Current
Sparkix Technologies, Pakistan

- Developed and maintained scalable full-stack applications using MongoDB, Express.js, React.js, and Node.js.
- Built responsive user interfaces with React and Tailwind CSS, and designed secure RESTful APIs for seamless integration.
- Integrated real-time features using Socket.io and Firebase Cloud Messaging (FCM), and implemented cron jobs for task automation.
- Optimized performance, maintained clean code, and collaborated with teams to deliver efficient solutions.

Full Stack Developer 01/07/2025 - 01/08/2025
ClickTake Technologies, Pakistan

- Designed, developed, and maintained scalable web applications across front-end (React.js) and back-end (Node.js, Express.js) environments.
- Ensured seamless integration between user interfaces and server-side logic.
- Managed relational databases by writing optimized SQL queries for data retrieval, storage, and performance tuning.
- Delivered high-quality, efficient, and secure digital solutions aligned with business goals.

Software Developer 01/01/2024 - 24/12/2024
Softwise Solution, Pakistan

- Designed and optimized interactive UI components using React, HTML, and CSS, ensuring responsive and visually appealing user interfaces.
- Utilized MongoDB, Express.js, and Node.js for backend development, integrating APIs and ensuring efficient data management and communication between server and front-end.

PROJECTS

WoodWard

- Developed Woodward, an AI-powered sales coaching SaaS platform built with Next.js, React, and TypeScript.
- Architected a multi-role system with dedicated dashboards for Admins, Coaches, and Sales Reps, featuring secure authentication and protected routes.

- Implemented an AI-driven call simulation module for real-time practice and feedback, along with a Playbooks system for managing and assigning sales scripts.
- Integrated Stripe for subscription and billing management, built performance analytics dashboards, and leveraged React Query and Tailwind CSS for a scalable, responsive user experience.

AI-Powered Voice Outreach & Candidate Screening System

- Developed a multi-tenant voice calling and outreach platform with a React/TypeScript frontend dashboard, a Node.js/Express backend for database operations and notifications, and a FastAPI Python server.
- Built the Python core to manage real-time, low-latency AI phone calls by streaming audio between Twilio Media Streams and the OpenAI Realtime API via WebSockets.
- Incorporated automated call scheduling, high-fidelity speech synthesis, and post-call AI analysis to score candidate interest and sync summaries back to Supabase.

Cordial-AI (Clinical AI Documentation & Compliance Platform)

- Developed a hybrid AI-powered web platform that automates clinical transcription, medical billing code (CPT/ICD-10) recommendation, and CMS compliance auditing.
- Built frontend interfaces for clinicians covering audio upload, compliance warnings, and conversational AI overrides.
- Orchestrated backend AI workflows via a Python Flask API, combining Deepgram for speech-to-text, OpenAI GPT for documentation audits, and a LangChain-Qdrant RAG pipeline for patient history vector searches.
- Integrated a custom XML template engine to dynamically compile and format audit-ready clinical notes into Word (.docx) documents.

Companion

- Developed a scalable RESTful API backend for an AI-powered mobile application using Node.js, TypeScript, Express.js, and MongoDB.
- Implemented secure JWT-based authentication with OTP email verification, password recovery, and OAuth (Google/Apple) integration.
- Designed an advanced task management system supporting one-time, recurring, and multi-date tasks with full timezone support.
- Built AI chat session management with message storage, search, pagination, and duplicate filtering.
- Integrated Firebase Cloud Messaging (FCM) for real-time push notifications and a cron-based scheduler (node-cron) for timezone-aware reminders.
