ABOUT ME

Mobile App Developer with 3+ years of experience building scalable cross-platform applications using React Native and full-stack technologies including Node.js, Express.js, and MongoDB. Skilled in developing high-performance mobile apps, RESTful API integration, and responsive UI development. Experienced in deploying applications to Google Play Store, integrating Firebase services, and implementing mobile monetization using Google AdMob. Passionate about building user-focused applications with clean, maintainable code and modern development practices.
